To the Editor, Quesnel Cariboo Observer:
This is an open letter to the following.

Northern Health.

Cariboo Regional Hospital District.

Bob Simpson MLA for Cariboo North.

To the above; being taxpayer representatives for this area. The headline in the Quesnel Cariboo Observer. \$20 million drips, begs the following questions.

- #1, Will a qualified Building Inspector with the qualifications of Mike Holmes be brought in to inspect Dunrovin Lodge extention?
- #2, Why should taxpayers and staff not have the proper elevator installed. This will be cursed every time it is used; for the life of the building. A proper building inspection may condemn the building because of the poor construction.
- #3, Is the Architect to blame? If so, he should be banned from drawing plans for any publicly funded building.
- #4, Is the Contractor to blame? If so, the warranty should apply, the elevator should be pulled out and replaced and all other defects repaired. If not fixed the Contractor should be banned from bidding on publicly funded projects.
- #5, Is the building Inspector to blame? If he cannot read the blueprints and know the Building Code he should be fired and not allowed to inspect publicly funded projects. He should have known.
- #6, Northern Health and the Cariboo Regional Health District. Are they willing to sign off on a \$20 million dollar poorly constructed building? Are they the real culprits in this fiasco? (a complete or ridiculous failure.)

Yours truly
